

MAMCA

STAKEHOLDER-BASED EVALUATION FRAMEWORK

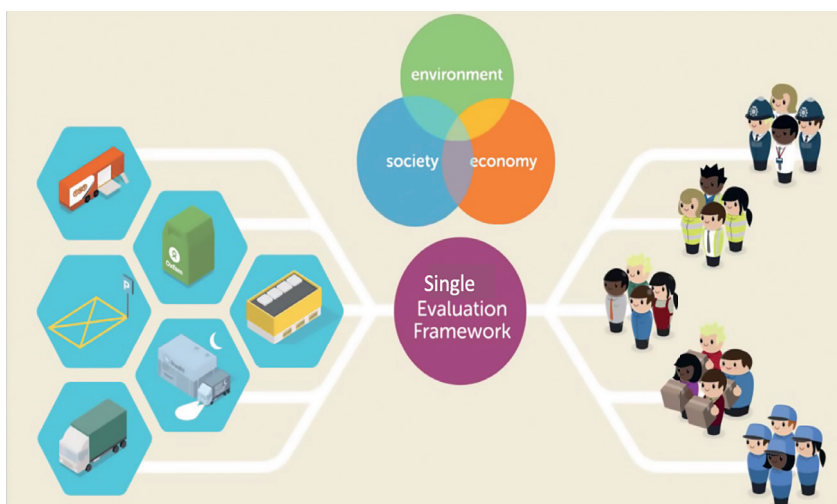

Do you want to involve several stakeholders in the evaluation process?

They are discussing about different possible options, but it difficult to find a common ground?

With the MAMCA, you can explicitly take their objectives into account and come to a good overview of the advantages and disadvantages of the different options.

It enables policy makers or project developers to get an insight of what is at stake and see if there is a support for certain options by many stakeholders and how it could be implemented.

GOAL:
Facilitating decisions
between stakeholders
with different priorities

GOVERNMENT

- Employment
- Quality of life
- Etc.

CITIZENS

- Pollution
- Safety
- Etc.

INDUSTRY

- Profit
- Investment risk
- Etc.

ONLINE MAMCA SOFTWARE

Our software tool MAMCA is online available and accessible at www.mamca.be. With the MAMCA software, you can handle all your multi-stakeholder evaluation problems.

WE OFFER SUPPORT

We also offer several services with regards to the MAMCA-method and software.

- Workshops
- Impact assessments
- Service packs for including MAMCA in education
